Index of Feature Material

MATERIALS & METHODS

Volume 25

January — June 1947, Inclusive

Feature editorial matter from Volume 25 of MATERIALS & METHODS covering issues from January through June 1947 is indexed here. Material covered in the index includes feature articles, MATERIALS & METHODS Manuals and Engineering File Facts.

For the sake of brevity, we have omitted from the index such departmental material as Shop Notes, Book Reviews, New Materials and Equipment, Contents Noted, Production Frontiers and The Last Word.

Abrasive Finishing of Plastics (File Facts)—Mar., p. 119
Achievement Award, MATERIALS & METHODS,—Jan., p. 56
Aircraft Control Cables, Nickel-Manganese-Chromium Steel Wire for,—April, p. 91

ALUMINUM AND ITS ALLOYS:

An Aluminum Solder That Requires No Flux—May, p. 81
Coloring of Aluminum (File Facts)—April, p. 145
Control of Raw Materials and Processes Assures Quality Aluminum Forgings—May, p. 63
Copper vs. Aluminum—Feb., p. 61
Economic Aspects in the Use of Aluminum and Magnesium Alloys—June, p. 63
Engineering Review—Jan., p. 91
New Strong Aluminum Casting Alloys—Jan., p. 121
Properties and Fabrication of Aluminum Alloys (File Facts)—May, p. 121
Atmospheres, Oxidizing, Stability of Alloys to, (File Facts)—Feb., p. 125
Average Ultimate Strength of Materials (File Facts)—May, p. 119

BRAZING (See Welding):

Broachability of Materials—April, p. 103
Carburization, Suspended,—Feb., p. 65

CAST IRON:

Engineering Review—Jan., p. 91
Austempered Cast Iron Serves as Cylinder Liners—May, p. 89
Changes in Endurance Limit of Gray Irons Caused by Heat Treatment (File Facts)—Jan., p. 119
Salvaging Iron Castings With Machinable Arc Welds—May, p. 68

CASTING:

Engineering Review—Jan., p. 98
New Strong Aluminum Casting Alloy—Jan., p. 68
Salvaging Iron Castings With Machinable Arc Welds—May, p. 68
Quick Analysis of Magnesium Foundry Heats—Feb., p. 90
Caustic Soda as a Quenching Medium for Steel—Jan., p. 75
Caustic Soda Solutions (File Facts)—Feb., p. 123
Chromate Finishes to Protect Zinc Surfaces—April, p. 113
Coloring of Aluminum and Its Alloys (File Facts)—April, p. 145
Cooperation Among Engineers and Production Men, We need More,—Mar., p. 63

COPPER, BRASS AND BRONZE:

Aluminum vs. Copper—Feb., p. 61
Bright Copper Plating—Jan., p. 82
Engineering Review—Jan., p. 93
Corrosion Resistance, New Spring Material Has High,—April, p. 100
Costs, Heat Treating, Foundries and Forge Shops Reduce,—April, p. 100

CUTTING:

Oxygen-Arc Process for Cutting Ferrous and Nonferrous Alloys—Jan., p. 78
Powder Cutting of High Alloys—Feb., p. 73
Deep Drawn Magnesium Parts Save Weight—Mar., p. 86

DRILLING:

Spacing for Hole Drilling—Jan., p. 68
Thrust Loads in Drilling (File Facts)—April, p. 147
Elgiloy, New Strong, Nonmagnetic Spring Material Has High Corrosion Resistance—April, p. 94
Endurance Limit of Alloyed Gray Irons, Changes in, Caused by Heat Treatment, (File Facts)—Jan., p. 119

ENGINEERING FILE FACTS:

Abrasive Finishing of Plastics—Mar., p. 119
Average Ultimate Strength of Materials—May, p. 119
Caustic Soda Solutions—Feb., p. 123
Changes in Endurance Limit of Alloyed Gray Irons Caused by Heat Treatment—Jan., p. 119
Coloring of Aluminum and Its Alloys—April, p. 145
Hardness of Magnesium Alloys—Mar., p. 121
Properties and Fabrication of Aluminum Alloys—May, p. 121
Specifications for Zinc and Zinc Alloys—Jan., p. 117
Stability of Alloys to Oxidizing Atmospheres—Feb., p. 125
Standard Stainless Steel Type Numbers, Chemical Composition Limits and Ranges—June, p. 123
Thermal Properties of Metals—Mar., p. 123
Thermocouple Protecting Tubes—April, p. 143
Thrust Loads in Drilling—April, p. 147
Tolerances for Impression Die Forgings—June, p. 125
Weldability of Magnesium-Base Alloys—Feb., p. 121
Engineering Review (MATERIALS & METHODS Manual)—Jan., p. 87
Extrusions, Magnesium, Offer Fabrication Economies—April, p. 96

FINISHING:

Abrasive Finishing of Plastics (File Facts)—Mar., p. 119
Coloring of Aluminum and Its Alloys (File Facts)—April, p. 145
Chromate Finishes to Protect Zinc Surfaces—April, p. 113
Electrostatic Spraying of Steel Wall Panels—Feb., p. 77
Manufacturing Economies Result from Barrel Finishing—June, p. 84
Materials and Finishes for Tropical Service—May, p. 77
New Process for Bright Copper Plating—Jan., p. 82
New Zinc-Base Finishes for Steel Parts—Mar., p. 95

FORGING AND FORMING:

Control of Raw Materials and Processes Assures Quality Aluminum Forgings—May, p. 63
Deep Drawn Magnesium Parts Save Weight—Mar., p. 86
Engineering Review—Jan., p. 101
Proper Selection of Steel Simplifies Deep Drawing—April, p. 108
Hardenability Bands, Selecting Steels by,—Mar., p. 68
Hardness of Magnesium Alloys (File Facts)—Mar., p. 121

HEAT TREATING:

Austempered Cast Iron Serves as Cylinder Liners—May, p. 89
Caustic Soda as a Quenching Medium for Steel—Jan., p. 75
Caustic Soda Solutions (File Facts)—Feb., p. 123
Changes in Endurance Limit of Alloyed Gray Irons Caused by Heat Treating (File Facts)—Jan., p. 119
Foundries and Forge Shops Reduce Heat Treating Costs—May, p. 100
Ingenious Steel Quenching Practices Developed by Farm Implement Makers—June, p. 77
Salt Bath Treatments for Metals (MATERIALS & METHODS Manual)—Mar., p. 99
Suspended Carburization—Feb., p. 65

INSPECTION AND TESTING:

Installing a Quality Control Program—Mar., p. 90
Quick Analysis of Magnesium Foundry Heats—Feb., p. 90
Iron Powder Parts, How to Evaluate Engineering Properties of,—June, p. 89

MACHINING:

Automatic Machining of Plastics—May, p. 73
Broachability of Materials—April, p. 103
Good and Bad Structures in Machining Steels—Feb., p. 80
Machining Problems in Production of Industrial Timing Mechanisms—June, p. 69
Spacing Holes for Drilling—Jan., p. 68
Thrust Loads in Drilling (File Facts)—April, p. 147

MAGNESIUM:

Deep Drawn Magnesium Parts Save Weight—Mar., p. 86

Economic Aspects in the Use of Aluminum and Magnesium Alloys—June, p 63
Hardness of Magnesium Alloys (File Facts)—Mar., p. 121
Quick Analysis of Magnesium Foundry Heats—Feb., p. 90
Magnesium Extrusions Offer Fabrication Economies—April, p. 96
Weldability of Magnesium and Its Alloys (File Facts)—Feb., p. 121
Magnesium Alloys (MATERIALS & METHODS Manual)—May, p. 99

MANUALS, MATERIALS & METHODS:

Annual Engineering Review—Jan., p. 87
Hard-Facing Materials—June, p. 103
Magnesium Alloys—May, p. 99
Plastics Primer for Engineers—April, p. 119
Salt Baths for Metals—Mar., p. 99
Weldments—Feb., p. 101
Manufacture of Balls for Bearings and Pens—June, p. 97
Materials and Finishes for Tropical Service—May, p. 77
Materials for Wire-Wound Resistors—May, p. 83
Modern Magnetic Materials—June, p. 72
Nickel-Steel Tubing, New 9%—Properties and Processing—Jan., p. 62

NONMETALLIC MATERIALS:

Abrasive Finishing of Plastics (File Facts)—Mar., p. 119
Automatic Machining of Plastics—May, p. 73
Blended Plastics Provide Wide Range of Characteristics—Feb., p. 69
Foamed Cellulose Acetate—A New Plastic—Jan., p. 58
Glass Fibers as Engineering Materials—Mar., p. 82
Materials for Wire-Wound Resistors—May, p. 83
Metallized Glass for Low Cost Joining of Glass to Metal—June, p. 81
Plastics Primer for Engineers (MATERIALS & METHODS Manual)—April, p. 119
What's Happening With Plastics Prices and Supplies—April, p. 79
Oxygen-Arc Process for Cutting Ferrous and Nonferrous Alloys—Jan., p. 78

PLATING (See Finishing):

PLASTICS (See Nonmetallic Materials):

Powder Cutting of High Alloys—Feb., p. 73
Powder Parts, Iron, How to Evaluate Engineering Properties of,—June, p. 89

PRESSWORKING (See Forming):

Printed Electrical Circuits, Materials and Techniques for,—Mar., p. 73
Quality Control Program, Installing a,—Mar., p. 90
Rigidized Metal—Feb., p. 83
Salt Baths for Metals (MATERIALS & METHODS Manual)—Mar., p. 99

SOLDERING (See Welding):

Spacing for Hole Drilling, New Method of,—Jan., p. 68
Spraying, Electrostatic, of Steel Wall Panels—Feb., p. 77
Spring Material, New Strong, Nonmagnetic, Has High Corrosion Resistance—April, p. 94

STEEL:

Caustic Soda as a Quenching Medium for Steel—Jan., p. 75
Electrostatic Spraying of Steel Wall Panels—Feb., p. 77
Good and Bad Structures in Machining Steel—Feb., p. 80
Ingenious Steel Quenching Practices Developed by Farm Implement Makers—June, p. 77
New 9% Nickel-Steel Tubing—Properties and Processing—Jan., p. 62
New Zinc-Base Finish for Steel Parts—Mar., p. 95.
Nickel-Manganese-Chromium Steel Wire for Aircraft Control Cables—April, p. 91
Proper Selection of Steel Simplifies Deep Drawing,—April, p. 108
Selecting Steel by Hardenability Bands—Mar., p. 68
Tool Steel Tubing—Feb., p. 87
Suspended Carburization—Feb., p. 65
Thermal Properties of Metals (File Facts)—Jan., p. 123; Mar., p. 123
Thermocouple Protecting Tubes (File Facts)—April, p. 143
Thrust Loads in Drilling (File Facts)—April, p. 147

TUBING:

Nickel Steel Tubing—New 9%, Properties and Processing,—Jan., p. 62
Tool Steel Tubing—Feb., p. 87
Weight Economy in Engineering Design—May, p. 59

WELDING AND JOINING:

An Aluminum Solder That Requires no Flux—May, p. 81
Case Histories Show Versatility of Resistance Welding—Mar., p. 77
Continuous Soldering of Small Motor Rotors Using High Frequency Heat—June, p. 94
Hard-Facing Materials (MATERIALS & METHODS Manual)—June, p. 103
Inert-Gas-Shielded Arc Welding for Difficult-to-Weld Materials—April, p. 86
Salvaging Iron Castings With Machinable Arc Welds—May, p. 68
Spotwelding in Aircraft Manufacturing—May, p. 92
Weldability of Magnesium-Base Alloys (File Facts)—Feb., p. 121
Weldments (MATERIALS & METHODS Manual)—Feb., p. 101
Wire, Nickel-Manganese-Chromium Steel, for Aircraft Control Cables—April, p. 91

ZINC:

Digest of Specifications for Zinc and Its Alloys (File Facts)—Jan., p. 117
Chromate Finishes to Protect Zinc Surfaces—April, p. 113
New Zinc Finish for Steels Parts—Mar., p. 95

Authors' Index

Barker, Lawrence J., Control of Raw Materials and Processes Assures Quality Aluminum Forgings—May, p. 63
Black, George
Chromate Finishes to Protect Zinc Surfaces—April, p. 113
Coloring of Aluminum and Its Alloys (File Facts) April, p. 145
Boynton, Henry C., Nickel-Manganese-Chromium Steel Wire for Aircraft Control Cables—April, p. 91
Bryan, F. R., and Nahstoll, G. A., Quick Analysis of Magnesium Foundry Heats—Feb., p. 90
Burpo, Robert S., Jr.
Abrasive Finishing of Plastics (File Facts)—Mar., p. 119
Changes in Endurance Limit of Alloyed Gray Irons Caused by Heat Treatment (File Facts)—Jan., p. 119
Digest of Specifications for Zinc and Zinc Alloys (File Facts)—Jan., p. 117
Weldability of Magnesium-Base Alloys (File Facts)—Feb., p. 121
Cady, Edwin Laird
Salt Baths for Metals (MATERIALS & METHODS Manual)—Mar., p. 99
Tool Steel Tubing—Feb., p. 87
Weldments (MATERIALS & METHODS Manual)—Feb., p. 101
Chase, Herbert
Magnesium Extrusions Offer Fabrication Economies—April, p. 96
Manufacturing Economies Result from Barrel Finishing—June, p. 84
Clauser, H. R.
Hard-Facing Materials (MATERIALS & METHODS Manual)—June, p. 103
Inert-Gas-Shielded Arc Welding for Difficult-to-Weld Materials—April, p. 86
New Oxygen-Arc Process for Cutting Ferrous and Nonferrous Alloys—Jan., p. 78
Cook, C. D., and Merritt, C., Jr., Materials and Finishes for Tropical Service—May, p. 77
Cordovi, M. A. (See Newell, H. D.)
Cullen, O. E. (See Widrig, S. L.)
DeArmand, David W., and Epstein, Samuel, Salvaging Iron Castings with Machinable Arc Welds—May, p. 68
Dever, Frederick S., Spotwelding in Aircraft Manufacture—May, p. 92
DuMond, T. C.
Magnesium Alloys (MATERIALS & METHODS Manual)—May, p. 99
New Method of Spacing for Hole Drilling—Jan., p. 72
Eastwood, L. W., Economic Aspects in the Use of Aluminum and Magnesium Alloys—June, p. 63
Enrich, Norbert L., Installing a Quality Control Program—Mar., p. 90
